**ADAPTIVE  
LENSES**

Continuously adjust  
to changing light

You're inside. You're outside.  
Your daily life keeps you  
moving back and forth  
between indoor light and  
bright sunshine. When your  
lenses seamlessly adapt to  
every situation, you always see  
life in the best light.

ORDINARY LENSES

TRANSITIONS® LENSES

Transitions® lenses go beyond vision correction. They continuously adapt to changing light conditions to optimize the amount of light that reaches your eyes, so you see everything the way it's meant to be seen.

Our lenses even block 100% of UVA/UVB rays while helping to protect your eyes from Harmful Blue Light\* indoors and out. *Transitions* lenses are available for most any frame or prescription and have options for every lifestyle and every age.

## FIND THE LENSES THAT FIT YOUR EVERYDAY LIFE

The *Transitions* family of brands has a product for anyone who wants more than a basic lens.

### Transitions® Signature®

lenses are fully clear indoors, with just the right amount of tint outdoors. They begin to darken as soon as you step outside and offer the fastest fade back to clear indoors.

### Transitions® XTRActive®

lenses provide extra protection from light outdoors, indoors, and even in the car. They are extra dark in bright sunlight and provide a hint of tint indoors to protect against harsh artificial light.

### Transitions® Vantage®

lenses not only adapt to changing light, they also polarize as they darken to reduce outdoor glare for better clarity and color.

\**Transitions* lenses with the Smart Blue Filter™ feature block at least 20% of Harmful Blue Light indoors and at least 85% of Harmful Blue Light outdoors. Harmful Blue Light is the blue-violet wavelengths believed most toxic to retinal cells, which lie between 415–455nm on the light spectrum.
